**NOVA Multi-Configurable Polishing System** KrellTech

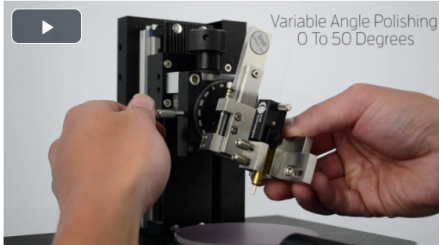

Maximum flexibility for optical surface processing is now available with NOVA™. This configurable system supports a variety of polishing applications from connectors to waveguides, and bare fibers to custom components. NOVA™ is scalable for R&D projects, mass production, and the rigors of high-reliability field installation.

Wireless tablet control with an Android interface provides the programming freedom required for research, as well as simplified step-by-step operation for manufacturing technicians. Integrated video modules are available for real-time process and surface inspection.

\*Manufacturer's specifications subject to change without notice.

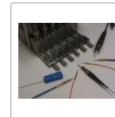

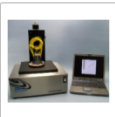

KrellTech manufactures advanced polishing systems and equipment for processing photonic components for markets ranging from telecom/datacom to industrial, and bio-medical to avionics. Our innovative approach to optical processing incorporates polishing with in-line inspection techniques for immediate quality feedback, reduced material handling and increased throughput, encompassing all facets of optical termination.

# Homepage Opportunities

\$500/<sub>MO</sub>

The screenshot shows the Photonic Solution Center homepage. At the top is a navigation bar with 'PRODUCT CATEGORIES', 'PRODUCTS', 'COMPANIES', 'RESOURCES', and 'CONTACT'. A 'REGISTER NOW' button is in the top right. The main content area features a large 'FEATURED PRODUCTS' section for the 'DART™ BARE FIBER ADAPTER SYSTEM' with a 'VIEW PRODUCT' button. Below this is a row of partner logos including Schleuniger, NEW SCALE, Xenics, asphericon, and TRF-CAP. The 'FEATURED VIDEOS' section lists several videos, with a play button icon over a video thumbnail. The 'WHAT'S NEW' section contains three cards for 'EVENTS' (SPIE PHOTONICS WEST 2021), 'JOBS' (KRELLTECH Engineering Technician), and 'PRESS' (KRELLTECH Field Polisher). At the bottom, there are four banner ad slots: 'VFI Cleave-Check INTERFEROMETERS', 'NOVA', and two identical 'IT'S EMPTY WITHOUT YOU.' ads. The footer includes a 'PHOTONIC SOLUTION CENTER' logo, a 'REGISTER NOW' button, a list of navigation links, an email subscription form, social media icons, and copyright information.

### 4D TECHNOLOGY CORPORATION

4D Technology designs and manufactures laser interferometers, surface roughness profilers, surface gauges and polarization cameras, for accurate measurement of precision surfaces and optical components.

[View Products](#)

### ABRISA TECHNOLOGIES

Abrisa Technologies is an ISO/ITAR global supplier of high quality, fabricated glass components, optical thin film coatings, and custom glass solutions for a wide variety of industries. Our facilities are located in California; Abrisa Industrial Glass and ZC&R Coatings for Optics. We serve diverse industries such as microelectronics and displays, semiconductor, military, automotive, aerospace, medical, biomedical and scientific R&D. We provide custom specialty flat glass and coating products for applications such as: flat panel display, touch and gesture recognition; visible to IR imaging and surveillance; entertainment, indoor and outdoor lighting; advanced instrumentation; and photonics.

[View Products](#)

### ADDISON PRECISION MANUFACTURING

Precision multi-axis turning including 10 Axis Swiss-turn, Up to 12 Axis Mill/Turn, Vertical and Horizontal up to full 5-Axis milling, Centerless and Super-precision cylindrical grinding and NADCAP Wire and Sink EDM, and honing; prototype and qualification parts.ISO 9001:2008, AS9100, NADCAP (for EDM, non-conventional machining) and ITAR listed/registered. We offer our customers over a 98% on-time delivery and a 99.7% initial shipment quality record

[View Products](#)

### ADLOPTICA GMBH

Adloptica GmbH works in field of refractive Laser Beam Shaping Optics transforming Gaussian to flat-top intensity profiles and finding applications in numerous industrial and scientific techniques. Result of multi year developments is realized in family of piShaper systems numbering today more than 60 models: almost 100% efficiency, spectrum from UV to IR, power from mW to kW, CW and pulse lasers, achromatic design, wide range of flattop spot sizes, low sensitivity to misalignment. Adloptica is locating in Adlershof, Berlin, Germany's leading science and technology park.

## ASSOCIATIONS

### THE OPTICAL SOCIETY--OSA INDUSTRY DEVELOPMENT ASSOCIATES

Founded in 1916, The Optical Society (OSA) is the leading professional association in optics and photonics, home to accomplished science, engineering, and business leaders from all over the world. Through world-renowned publications, meetings, and membership programs, OSA provides quality information and inspiring interactions that power achievements in the science of light.

Look  
here.

### LASER INSTITUTE OF AMERICA

The Laser Institute of America (LIA) is the professional society for laser applications and safety. Our mission is to foster lasers, laser applications, and laser safety worldwide. Serving the industrial, medical, research and government communities for over 45 years, LIA offers technical information, training and networking opportunities to laser users from around the globe.

Advertise  
Here  
Click to contact us.

### SPIE

SPIE is an international not-for-profit professional society for optics and photonics technology, founded in 1955. SPIE is dedicated to advancing the scientific research and engineering applications of optics and photonics through international conferences, education programs and publications.

[View Publications](#)

### THE SPECTROSCOPY SOCIETY OF PITTSBURGH

About the SSP The Spectroscopy Society of Pittsburgh (SSP), along with our sister society, the Society for Analytical Chemists of Pittsburgh (SACP), is a non-profit organization dedicated to furthering science education in the Western Pennsylvania region. To that end, with proceeds from Pittcon, we support member education programs, teacher and student awards, a wide variety of educational programs, and grant programs for high schools, colleges, and beginning university professors.
